

Every lesson note you already wrote, worth three times more.

StudyAI turns the notes a teacher already has into flashcards, quiz questions and study guides. Teachers stay in charge of every word, and pupils get revision material that actually fits what they were taught.

One note in. A full study pack out.

Flashcards, questions, study guides, images

STEP 1

Start with a note

Use the lesson material that already exists. There is nothing extra to write.

STEP 2

Let it build

Flashcards, quiz questions and a study guide are drafted in a couple of minutes.

STEP 3

A teacher checks it

Every draft is read and approved by a teacher before anyone else sees it.

STEP 4

Pupils revise better

Cards come back more often for the topics a pupil keeps getting wrong.

Teachers

Less time preparing, more time actually teaching the class.

Pupils

One clear screen showing what to revise and which exam comes next.

Schools

Full visibility of every class, every teacher and every naira spent.

Built in minutes

A full set of revision material from notes that already exist.

A teacher always approves

Nothing is published to pupils until a teacher has read and approved it.

Costs stay predictable

The school sets a monthly limit per teacher and the system holds to it.

Book a free walkthrough

We will load your own subjects and show you the whole thing.
