

FOR SCHOOL OWNERS

Better results. No new staff. No runaway bill.

StudyAI turns the lesson notes your teachers already write into flashcards, exam questions and study guides. You set the monthly spending limit. Nothing reaches a pupil until a teacher approves it.

What a proprietor actually gets: **control, not another subscription you cannot see.**

A hard cap on AI spend

Set a monthly limit per teacher. The system enforces it automatically, so the bill cannot surprise you.

One dashboard for the school

Every class, every teacher, every subject and every naira spent, on one screen.

Your syllabus, your teachers

Built from your own notes, so it matches what your school actually teaches.

Nothing published unchecked

Every generated question stays a draft until one of your teachers reads and approves it.

More teaching, less preparing

Teachers keep the hours they used to lose to typing revision material by hand.

Something to show parents

Structured revision material for every class, and exam results you can point to.

A term of revision material for **less**
than the price of one textbook.

You set it

Monthly limit per teacher, fixed by the school

Free demo

Loaded with your own subjects and classes

See it running on your own school

We set it up with your subjects, then you decide. No obligation.
