

Turn one set of notes into a complete study pack.

StudyAI helps teachers generate flashcards, exam questions and study guides from material they already have — reviewed and approved before a single student sees it.

Minutes

Build a full revision pack from one lesson note, instead of an evening's work.

Teacher-led

Nothing generated reaches a student until a teacher reviews and publishes it.

Budgeted

Every AI request is metered per teacher and school, with hard spending limits.

Demo Material

Description

Quadratic Equations & the Discriminant

Save changes

Generate flashcards, questions, study guides and images from a single teaching material.

For teachers

Classes, materials, exams and a shared question bank in one place — with AI doing the repetitive preparation.

For students

A clear view of classes, upcoming exams and flashcards scheduled by spaced repetition for real retention.

For leadership

Multi-school administration, role-based access and full visibility of AI usage and cost.

Everyone signs in to the workspace built for their job.

Access is enforced on the server, not hidden in the interface — and every school's data is fully isolated from every other.

Super Admin
PLATFORM OWNER

Schools, AI providers, token budgets, cross-school analytics. Onboard a new school without touching code, choose the AI provider, and set the spending ceiling before costs are incurred.

School Admin
HEAD / REGISTRAR

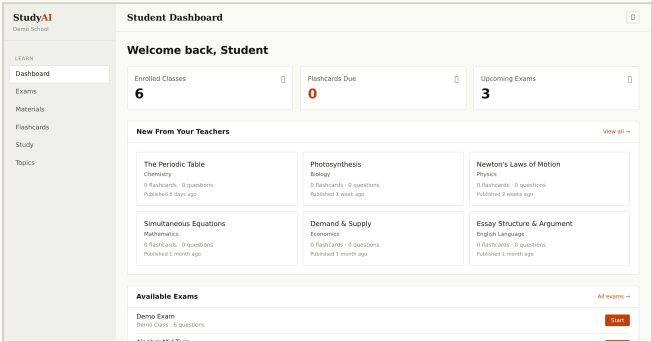

Members, classes, subjects, terms and school analytics. Invite staff and students in bulk, assign roles, structure the curriculum and track engagement across every cohort.

Teacher
CLASSROOM STAFF

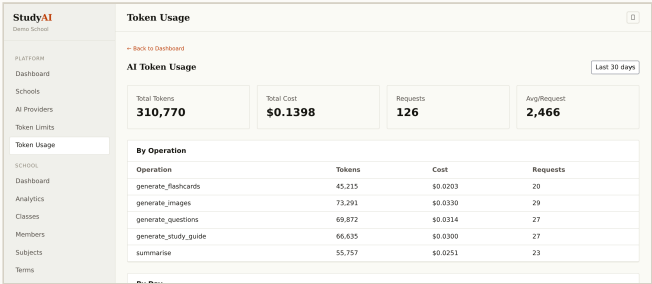

Materials, AI generation, exams and the question bank. Turn notes into study resources, build assessments question by question, and reuse a library the whole school contributes to.

Student
LEARNER

Classes, exams, flashcards and study tools. A dashboard that shows exactly what to do next, with cards that resurface precisely what they keep getting wrong.

Students see classes, exams due and flashcards at a glance.

Leadership sees exactly where AI spend is going.

See it running with your own subjects.

Every screen shown here is the working product, not a mockup. We can load your curriculum and walk your team through it end to end in under an hour.
